NEW DELHI, 3 (INDIA); }
The 26th February, 1951. }

S. P. JAIN,
for Registrar General, India.

NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 3rd February, 1951—*contd.*

Explanation of symbols used:—B.—Births; B.R.—Birth rate; C.—Cholera; S.—Smallpox; P.—Plague; F.—Fever; D.D.—Dysentery and Diarrhoea; R.D.—Respiratory diseases; M.D.—Maternal Deaths; D.R.—Death rate; I.D.—Infantile Deaths (included in total deaths).

REMARKS

The figures of births and deaths shown in this statement for the week ending the 3rd February, 1951, relate to 155 towns with an estimated population of 19,625 thousands. The total number of towns is 234 and their population is 29,017 thousands. Thus 66% of the total number of towns representing 68% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 13,666 and 7,506 representing birth and death rates of 36.2 and 19.9 per thousand of population respectively.

(A) States (Parts A & C).—The data here relate to 137 towns with an estimated population of 16,946 thousands. Information about Assam, Bihar, Madhya Pradesh and West Bengal could not be included. The total number of towns is 202 and their population is 25,187 thousands. Thus 68% of the total number of towns representing 67% of the total population is covered. The numbers of births and deaths recorded in these towns were 12,292 and 6,749 representing birth and death rates of 37.7 and 20.7 per thousand of

population respectively. The table at the end gives the position by States.

Three towns Mayuram, Nellore and Palyaamkottai in Madras recorded high death rates of 70.9, 52.0 and 59.6 per thousand of population respectively. In Mayuram the high death rate was largely due to deaths from cholera and in Nellore due to deaths from smallpox and fevers. In Palyaamkottai the high death rate was not due to any one of the specified causes.

(B) States (Part B).—The data here relate to 18 towns with an estimated population of 2,679 thousands. The total number of towns is 32 and their population is 3,830 thousands. Thus 56% of the total number of towns representing 70% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,374 and 757 representing birth and death rates of 26.7 and 14.7 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
